In interpreting experiments or formulat 1 Compare Armsby, Principles of Animal Nutrition, pp. 117-127. ing a maintenance ration, therefore, it is not sufficient to consider simply the amount of protein, but account must be taken of the supply of nonnitrogenous materials. VALUE OF NONPROTEIN. The crude protein of the feed of farm animals includes not only true protein but a great variety of other nitrogenous substances, grouped for convenience under the designation Nonprotein. In considering the results of experiments upon the protein requirements of these animals, therefore, it is necessary to determine whether the true protein should be the basis of comparison or whether the nonprotein has some value for maintaining the protein tissues of the body....
